Summary

Results-driven Flutter Developer with 3 years of experience in the Industry field. Holds a BS in Computer Science from the University of Swat. Proficient in mobile application development using Flutter and Dart, with expertise in OOP concepts, APIs integration, and software development using agile methodologies.

Experienced in clean architecture and reusable code. Familiar with Node.js (junior level), MongoDB, Express, Firebase, Git, and GitHub.

Experience

Flutter Developer at histudio.co

August 2020 - June 2021

- Developed and maintained mobile applications using Flutter and Dart.
- Integrated APIs for seamless data flow within applications.
- Implemented clean architecture and reusable code practices in collaboration with cross-functional teams.
- Utilized Firebase for efficient data storage and retrieval.

Flutter Developer at teknovation.io

August 2021 - July 2022

- Collaborated with cross-functional teams to follow agile methodologies for software development.
- Organized codebase using clean architecture principles for improved maintainability.
- Actively contributed to the team's version control system using Git.
- Integrated third-party APIs to enhance application functionality.
- Implemented sockets for real-time data flow.

Flutter Developer at ASK

Nov 2022 - Present

- Engaged in multifaceted software engineering activities within the development team.
- Followed agile methodologies for efficient feature and improvement delivery.
- Organized codebase using clean architecture principles for better maintainability and scalability.
- Actively contributed to the team's version control system using Git.
- Integrated third-party APIs for enhanced functionality.
- Implemented sockets for real-time data, emphasizing a commitment to high-quality mobile application development.

Education

University of swat

- Currently pursuing the final semester of a Bachelor of Computer Science program.

Skills

- Mobile Application Development: Flutter, Dart
- Object-Oriented Programming (OOP) Strong understanding and application
- APIs Integration: Proficient in integrating APIs for enhanced application functionality
- Backend Development (Basic Level): Node.js, Express
- Database: MongoDB, Firebase, Appwrite.
- Version Control: Git, GitHub
- Software Development Methodologies: Agile, Waterfall.
- Architecture: Clean architecture, Reusable code practices
- Other: HTML, CSS, JS, C++, Python.
